SUMMARY

I'm an aspiring software engineer studying at the University of Northampton. My interest in software engineering grew from the satisfaction of solving problems and seeing how thoughtful code can make a system work smoothly. I'm motivated by the challenge of turning an idea into a practical solution, and by understanding how the different parts of a system work together to achieve it. Through hands-on web and Python projects, I've used JavaScript, HTML, CSS, React, Node.js, Express, MongoDB and Pandas. I'm continuing to develop my skills in Java, PHP and SQL. I'm looking for an opportunity to grow as a developer, contribute to a supportive team and build practical, user-focused digital solutions. I bring curiosity, a collaborative approach and a willingness to keep learning, and I hope to help create technology that makes a positive difference.

WORK EXPERIENCE

Uniper, Birmingham **Jan 2024 – Mar 2024**
Business Analyst

- Researched business challenges and identified digital solutions relevant to the company's efficiency and sustainability goals.
- Collaborated with colleagues and stakeholders to create and present prototypes, giving them practical ideas to consider for improving existing processes.

Dudley Council, Dudley **Dec 2024 – May 2025**
Digital Assistant

- Supported teams across departments with digital tasks and workflow improvements, helping colleagues complete their work more effectively.
- Analysed data, prepared reports and presented project updates, making key information easier for teams to understand and use in decisions.

Café Burov, Varna **Jun 2025 – Aug 2025**
Barista

- Processed customer orders and payments accurately during busy shifts, helping provide efficient service while maintaining attention to detail under pressure.
- Worked with colleagues to keep daily operations running smoothly by preparing drinks and monitoring stock, helping the team serve customers and stay organised.

EDUCATION

BSc Software Engineering **Sep 2025 – Present**
University of Northampton

- Developing software engineering skills through coursework and practical projects, strengthening problem-solving and programming ability.
- Built a Python library management system with a user interface and data handling, applying programming concepts to create a practical tool for managing library records.
- Creating a portfolio website to present technical projects, making my work and developing skills easy for others to explore.

T-Level: Digital Production, Design and Development **Sep 2023 – Jun 2025**
Dudley College

- Grade: Merit
- Used Python and Pandas to analyse and work with data, developing practical data-handling and problem-solving skills.
- Built a MERN-stack digital solution for Rosa Technologies, a fictional solar panel company, applying MongoDB, Express, React and Node.js to address a business need.

GCSEs **Sep 2017 – Jun 2023**
The Dormston School, Sedgley

- Maths – 7
- English Literature – 5
- English Language – 5

PROFESSIONAL SKILLS

- Teamwork and collaboration
- Clear written and verbal communication
- Problem-solving and logical thinking
- Attention to detail
- Time management and organisation
- Adaptability and willingness to learn
- Presenting ideas and explaining technical work
- Taking feedback and using it to improve

TECHNICAL SKILLS

- Used in projects/coursework: Python, JavaScript, HTML, CSS, React, Node.js, Express, MongoDB, SQL, relational databases and Pandas
- Basic knowledge / currently learning: Java, PHP and object-oriented programming (OOP)

INTERESTS

- Going to the gym
- Reading
- Watching films
- Gaming

ACHIEVEMENTS

- Python library management system: Built a system with a user interface and data handling using Python.
- Rosa Technologies digital solution: Developed a digital solution for a fictional solar panel company using MongoDB, Express, React and Node.js.
- Portfolio website: Creating a website to showcase my projects and technical skills. HTML, CSS and JavaScript
- Portfolio website for my sister: Built a website to showcase her work using HTML, CSS and JavaScript.
- Snack Man game: Built a game using HTML, CSS and JavaScript.
- CV builder website — In progress: Building a CV creation website using HTML, CSS and JavaScript. Implemented functionality that displays users' input in a structured CV layout.
